Front-end developer & web developer with 4 years of experience, I specialize in JavaScript development, particularly with React, NextJS, and React Native. I've participated in projects connected with different fields such as iGaming, Marketing, and FinTech. I'm developing my project - an accessible tourism platform for people with disabilities.

WORK EXPERIENCE

2023-2024
JavaScript developer
as Freelancer

Developed a car rental service that helped users find preferred car for renting. Create a product in collaboration with designers and used modern stack of technologies

Stack: React, NextJS, Zustand, Supabase

2022-2023
JavaScript developer
at Global Logic LTD

Part of a front-end developers team that created MVP of the app: back-office that helped users to add information about insurance cases

Collaborated with designers and back-end developers to service existing app functionality and create new features

Stack: React, Redux-Toolkit, TypeScript, Jest

2021-2022
Front-end developer
at Global Genesis LTD

Part of a front-end developers team that created a back-office for handling players and users of online casino

Collaborated with designers, back-end developers, and testers to service existing app functionality and create new features

Stack: React, Redux, TypeScript, Cypress

2020-2021
Front-end developer
at Online Event Space

Part of a front-end developers team that created a system of landing pages for online events. I've created pages for marketing purposes

Created new features of the pages based on NextJS connected with GraphQL and Apollo Client

2013-2019
Web-developer
at SitesLab Agency

Part of a developers team that created products to increase sales for small business segment. Collaborated with the designers to develop more efficient websites

Stack: HTML, CSS, PHP, MySQL, Wordpress
